

HAS UPTAKE OF THE FOUR-DAY WORKING WEEK INCREASED?

A year ago, we distributed a survey to gauge sentiment around the four-day working week, a practice that had just been piloted by 61 companies as part of a UK-wide trial.

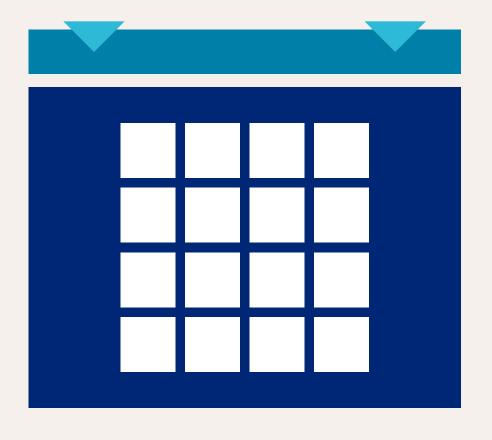

Of the total number who took part in the trial, 54 (89%) are still operating the policy one year on, with 31 (51%) making it a permanent arrangement. But are we getting any closer to the four-day week becoming a reality throughout the world of work?

To get an up-to-date picture, we surveyed almost 11,900 professionals and employers to see whether the uptake of this working practice has increased, how it's impacting talent attraction, and the challenges of implementing it.

of the participants in the trial are still operating the policy one year on

While

have made the arrangement permanent

THE CURRENT **STATE OF PLAY**

Excluding those who are unable to consider implementing a four-day working week due to their organisation or sector:

2024:

Have introduced or are trialling a four-day week

11%

Are considering implementing it

15%

Aren't considering it

74%

2023:

Have introduced or are trialling a four-day week

7%

Are considering implementing it

21%

Aren't considering it

72%

A year ago, only 7% of employers had introduced or were trialling a four-day working week. That's now risen to 11%

IMPACT ON TALENT ATTRACTION

78%

of the employers offering a four-day working week believe it helps their candidate attraction strategy

51%

of professionals would be **tempted to move to a different organisation** if it was offering a four-day working week

12%

said they would not be tempted by the offer of a four-day working week, an increase from 6% last year

28% of employers would be more likely to consider offering a four-day working week if staff spent all four days in the workplace

EMPLOYERCHALLENGES

Why are employers unable to consider implementing a four-day working week?

2024:

We are not prepared from an operational perspective

57%

We are concerned about the impact on productivity

34%

We are not prepared from a financial perspective

20%

We are concerned about the pressure on staff

17%

2023:

We are not prepared from an operational perspective

53%

We are concerned about the impact on productivity

46%

We are not prepared from a financial perspective

19%

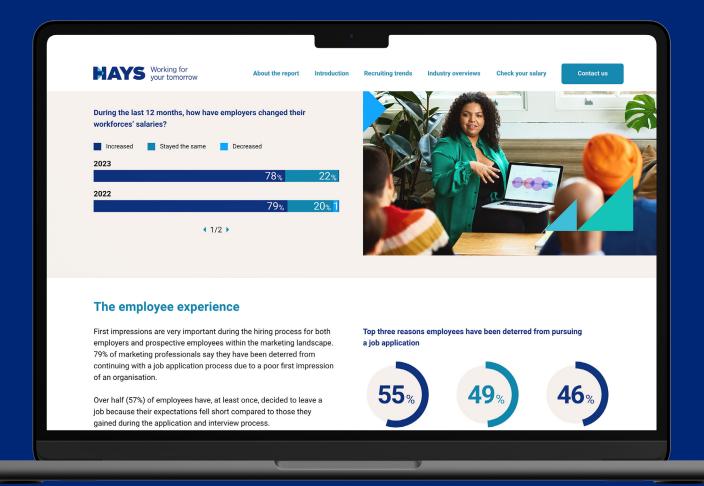

We are concerned about the pressure on staff

20%
